Caution

Stripe can automatically present the relevant payment methods to your customers by evaluating currency, payment method restrictions, and other parameters.

Follow the [Accept a payment](#) guide to build a Checkout integration that uses **dynamic payment methods**.

If you don't want to use dynamic payment methods, follow the steps below to manually configure the payment methods in your Checkout integration.

Accepting SEPA Direct Debit payments on your website consists of creating an object to track a payment, collecting payment method information and mandate acknowledgement, and submitting the payment to Stripe for processing. Stripe uses this payment object, the `PaymentIntent`, to track and handle all the states of the payment until the payment completes.

Note

SEPA Direct Debit is a **delayed notification payment method**, which means that funds aren't immediately available after payment. A payment typically takes **5 business days** to arrive in your account.

1 Determine compatibility

Supported business locations: Europe, US, CA, NZ, SG, HK, JP, AU, MX

Supported currencies: `eur`

Presentment currencies: `eur`

Payment mode: Yes

Setup mode: Yes

Subscription mode: Yes

To support SEPA Direct Debit payments in Checkout, **Prices** for all line items must be expressed in Euro (currency code `eur`).

2 Accept a payment

Note

This guide builds on the foundational [accept a payment](#) Checkout integration.

Use this guide to learn how to enable SEPA Direct Debit—it shows the differences between accepting payments using dynamic payment methods and manually configuring payment methods.

Enable SEPA Direct Debit as a payment method

When creating a new [Checkout Session](#), you need to:

- 1 Add `sepa_debit` to the list of `payment_method_types`.
- 2 Make sure all your `line_items` use the `eur` currency.

[Stripe-hosted page](#)

[Embedded form](#)

[Command Line](#)

[cURL](#)

```
$ curl https://api.stripe.com/v1/checkout/sessions \
> -u "sk_test_51SpFFj2NJGvegKCXZPo...Se2rfwUYM500650YpqYD:" \
> -d "line_items[0][price_data][currency]=eur" \
> -d "line_items[0][price_data][product_data][name]=T-shirt" \
> -d "line_items[0][price_data][unit_amount]=2000" \
> -d "line_items[0][quantity]=1" \
> -d mode=payment \
> -d "payment_method_types[0]=card" \
> -d "payment_method_types[1]=sepa_debit" \
> --data-urlencode "success_url=https://example.com/success"
```

Fulfill your orders

After accepting a payment, learn how to fulfill orders.

3 Test your integration

Stripe provides several test numbers you can use to make sure your integration is ready for production.

Test IBANs

Use these test IBANs with the Payment Element to test your SEPA Direct Debit integration. The Payment Element automatically validates the IBAN and displays the mandate when you enter one of these test values.

Netherlands

ACCOUNT NUMBER	TOKEN	DESCRIPTION
NL39RAB00300065264	pm_success_n1	The PaymentIntent status transitions from processing to succeeded.
NL55RAB00300065267	pm_successDelayed_n1	The PaymentIntent status transitions from processing to succeeded after at least three minutes.

ACCOUNT NUMBER	TOKEN	DESCRIPTION
NL91ABNA0417164300	pm_failed_nl	The PaymentIntent status transitions from <code>processing</code> to <code>requires_payment_method</code> .
NL28RAB00300065268	pm_failedDelayed_nl	The PaymentIntent status transitions from <code>processing</code> to <code>requires_payment_method</code> after at least three minutes.
NL82RAB00300065266	pm_disputed_nl	The PaymentIntent status transitions from <code>processing</code> to <code>succeeded</code> , but a dispute is immediately created.
NL27RAB00000343434	pm_exceedsWeeklyVolumeLimit_nl	The payment fails with a <code>charge_exceeds_source_limit</code> failure code due to payment amount causing account to exceed its weekly payment volume limit.
NL86RAB00000121212	pm_exceedsWeeklyTransactionLimit_nl	The payment fails with a <code>charge_exceeds_weekly_limit</code> failure code due to payment amount exceeding account's transaction volume limit.
NL55RAB00300065267	pm_insufficientFunds_nl	The payment fails with an <code>insufficient_funds</code> failure code.

4 Handle refunds and disputes

The refund period for SEPA Direct Debit is up to 180 days after the original payment.

Customers can dispute a payment through their bank up to 13 months after the original payment and there's no appeal process.
