-  Netherlands
-  English (United Kingdom)

iDEAL | Wero payments can be refunded up to 180 days after the original payment. Refunds can remain in a pending state for up to 7 days. After 7 days, if no failure signal is received, the refund is considered successful.

Website requirements

If you’re based in the Netherlands, your website must comply with iDEAL | Wero scheme rules by clearly displaying your KVK (company registration) number with the Chamber of Commerce. If you aren’t based in the Netherlands, your website must display your registration number with the equivalent local official body.

Connect

When using iDEAL | Wero with [Connect](#), the connected account’s name must map to its actual business, not to the platform. This is important for regulatory compliance and customer trust, because customers will see this business name during the iDEAL | Wero payment flow.
